Art Unit: 2661

1. A telephone call was made to Mr. Charles Miller on Monday, May 16, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to restriction, classified in class 370, subclass 466.
- II. Claims 13-34, drawn to restriction, classified in class 370, subclass 230.

The inventions are distinct, each from the other because of the following reasons:

As to claims 1-12, the claimed invention is about a method of adding at least one redundant frame accordingly in a packet in order to compensate packet loss along the path between a source and a destination.

As to claims 13-34, the claimed invention is about a method of gathering QOS information at a monitoring station from the destination of interest in a network by sending a test packet periodically, and the monitoring station alters future call setup according to the gathered information.

Because these inventions are distinct for the reasons given above, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
